Fact Sheet

January 2014

Vapor Mitigation Systems to be Offered to Elmwood Park Residents Chicago Heights Boulevard Site St. Louis County, Missouri

BACKGROUND

TIMELINE FOR INSTALLATIONS

Although not all details of the installation plan have been worked out yet, it is expected that the systems will be installed in a phased approach over the next few months.

Property owners in the eligible area should expect to be contacted by a representative of PerkinElmer to determine participation in this effort. The representative will ask property owners if they wish to sign an access agreement to have a system installed in their home, and arrange a date for the installation. After the system is installed, each home will need to be sampled periodically to ensure that the system is operating properly.

COMMUNITY ADVISORY GROUP MEETING

The Elmwood Park community has established a Community Advisory Group (CAG). EPA continues to work with the CAG to provide information to the community.

Representatives of EPA Region 7 and PerkinElmer will attend the next CAG meeting to provide information and answer questions about

the voluntary mitigation effort. Representatives of ATSDR will also attend to answer questions about the Health Consultation.

The meeting will be held from 6:30 p.m. to 8:00 p.m. on Thursday, January 16, 2014, at the First Baptist Church of Elmwood Park, 1452 Dielman Road, St. Louis, Mo., 63132.
